

MAKE 7

For 2 players
Ages 7 to adult

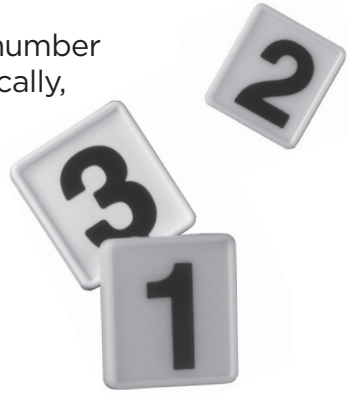

RULES

OBJECT OF THE GAME

Be the first player to have your color number tiles add up to 7 in a straight line vertically, horizontally or diagonally.

CONTENTS

- 1 Game Console
- 1 Console Base
- 26 Green Number Tiles
- 26 Yellow Number Tiles
- 1 Label Sheet

SET UP

Remove the red square labels from the label sheet and place them on the raised squares on both sides of the game console. Remove the “Make 7” labels from the label sheet and carefully place them at the top of each side of the game console, as shown on the package.

Place the game console into the console base by sliding the two large tabs on the game console into the tab openings on the console base. Make sure that the release knob on the side of the console is positioned so that the tiles will stack at the bottom and not fall through the base.

One player takes all of the green tiles; the other takes all of the yellow tiles. To determine which player goes first, one player secretly puts one yellow tile in one hand, and one green tile in the other hand. The other player chooses one of that player’s hands. The player whose color tile is in the hand that was chosen starts the game.

PLAYING THE GAME

On your turn, place one of your color number tiles in any of the seven slots at the top of the game console. The only rule in placing your tiles is that a 3 can only be placed so that it lands in a red square. 1s and 2s can go anywhere – including the red squares! Play then passes to the other player.

WINNING THE GAME

The first player to Make 7 by connecting his/her tiles in a straight line – vertically, horizontally, or diagonally – wins the game!

When you are ready to play again, turn the easy release knob located on the side of the game console, and the tiles will fall out. Reposition the knob and get ready for your next game!
